PROFESSIONAL SUMMARY

Information Technology student at De La Salle Lipa with hands-on full-stack development experience through academic projects. Experienced in building frontend interfaces, backend functionality, database integrations, authentication, and role-based features using JavaScript, React Native, Supabase, and related technologies. Seeking a Full-Stack Developer or Software Developer OJT opportunity while remaining open to other IT roles.

EDUCATION

De La Salle Lipa — Lipa City, Batangas

Bachelor of Science in Information Technology | Expected Graduation: June 2, 2027

TECHNICAL SKILLS

Programming: Python, Java, C++, JavaScript, TypeScript, SQL, PHP

Web & Mobile: React, React Native, HTML, CSS, Tailwind CSS, Bootstrap, Expo, Next.js

Database & Backend: MySQL, Supabase, MongoDB, SQLite, PostgreSQL, Node.js

Tools: Git, GitHub, VS Code, Vite, Figma, Postman, Linux, UIPath, PowerBI, Vercel

SOFT SKILLS

• Problem Solving | Team Collaboration | Adaptability | Time Management | Willingness to Learn

PROJECTS

PalengkeHub — Full-Stack Developer | **September 2025 - October 2026**

• Developed a mobile marketplace application for public-market price transparency and pre-ordering, enabling consumers to view product prices, locate stalls, and place orders.

• Integrated Supabase authentication and database operations to support consumer, vendor, and administrator workflows, including product management, transaction processing, and administrative reporting.

IT Elective 4 Project — Full-Stack Developer | **August 2026 - Present**

- Built a full-stack app with React + Express + MongoDB, delivering JWT-authenticated CRUD with protected routes and tenant-isolated data across a REST API
- Integrated Google Gemini AI into a live endpoint (POST /api/ai), returning structured JSON reviews validated with Zod and rate-limited to prevent quota abuse
- Deployed both frontend and backend to Vercel with environment-driven configuration, managed via a multi-branch Git workflow with Pull Requests per deliverable

ShinPay+ — Full-Stack Developer (In Progress) | **September 2026 - Present**

- Developing a multi-tenant payroll and HR SaaS application designed to support employee management, payroll processing, and Philippine statutory compliance for local businesses.
- Building full-stack application functionality using Next.js App Router and TypeScript, with Supabase providing PostgreSQL database services, authentication, file storage, and Row-Level Security (RLS).
- Implementing tenant-aware data access controls to help isolate business data and protect information across organizations.
- Using Tailwind CSS to build responsive user interfaces and Vercel for application deployment.

CERTIFICATIONS

- Python Essentials 1 — Cisco Networking Academy
- Python Essentials 2 — Cisco Networking Academy
- Bridging Ethical Hacking and Data Analytics: Building Smarter and Safer Systems — De La Salle Lipa, 2026
- AI Ethics and Governance — USAID / Asia Open RAN Academy
